Hörmann Garage Sectional Door DSU

Contemporary door design for added beauty, safety and convenience

Made in Germany

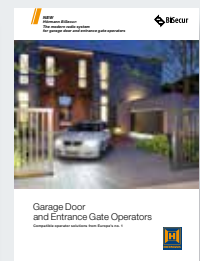

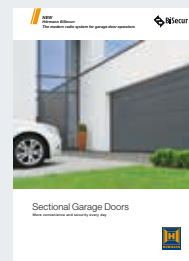

Hörmann M-ribbed sectional garage doors are engineered in Germany, and assembled in the U.A.E. The doors come as a complete package that includes panels, tracks, torsion spring assembly, fitting material and an operator with hand transmitters. Complying with current CE standards, and thanks to the uncompromising quality as well as highest technical standards of Hörmann products, you receive a 10 year warranty on all Hörmann sectional garage doors and a 2 year warranty on all Hörmann operators.

Enjoy the benefits of engineering excellence

You will feel it the first time you operate your new garage door: The decision for more beauty, safety and convenience was exactly right. Choose from an array of options to match the architecture of your home and enjoy the quality experience. All doors are equipped with a door operator that is virtually maintenance-free and provides you with the latest in engineering excellence.

Please refer to our additional brochure for further door options and ask for our operator brochure to see all details on our garage door operator.

Door design options and door automation

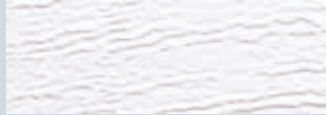

DSU 40 M-ribbed

Colour choice

Our colours are polyester-primer coated on hot galvanised steel with a woodgrain embossment. The durable finish allows for minor scratches to be repaired without leaving any visible sign of damage, and largely prevents dust and dirt from settling. The outside of the door comes in the colour of your choice while the inside is Grey White (RAL 9002), stucco textured.

Light Ivory (RAL 1015)

Traffic White (RAL 9016)

Your choice of glazings

Incorporate glazing to give your garage an individual look or to match the architectural style of your home. The DURATEC® synthetic double glazing in Hörmann's sectional doors is exceptionally resistant to scratches even after repeated washing and heavy use.

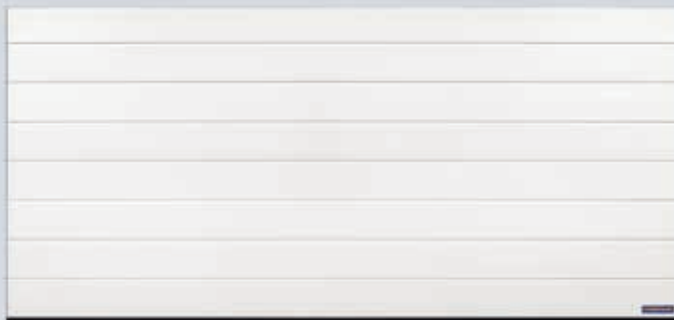

Glazing S0

Glazing S2

Only from Hörmann

Hörmann M-ribbed sectional doors are available up to 6000 mm wide and up to 3000 mm high.

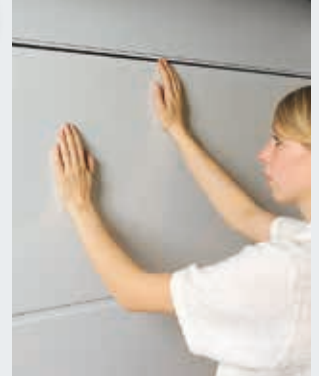

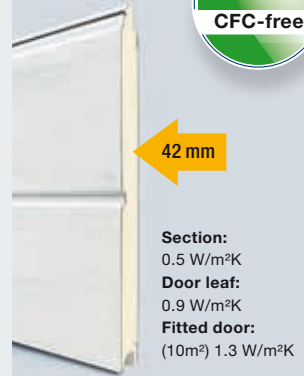

Maintenance-free quality door operator

For your own safety, security and convenience, all of our sectional garage doors come with a door operator, photocell and hand transmitter. It is virtually maintenance-free. Our highly sensitive closing edge safety device and the additional photocell protects homeowners from accidents and prevents damage to property.

The benefits of steel

By nature, steel offers unmatched rigidity and strength. For lasting durability, parts on our doors are galvanised. This provides corrosion resistance and ensures a long, trouble-free service life of the door and its components.

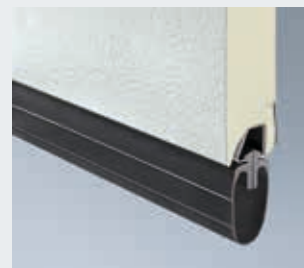

The door sections

The door sections are urethane foam filled, reducing the loss of conditioned air and increasing your energy savings.

Finger-trap protection is on the outside and inside of the sections and along the hinges

The unique shape of the door sections ensures there are no crush zones, neither between the sections nor in the region of the hinges.

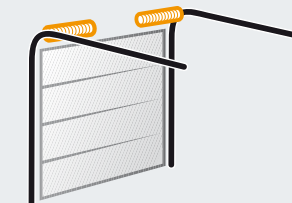

Bottom seal

Thanks to its large-sized profile lip, the bottom seal can easily accommodate slight irregularities in the floor.

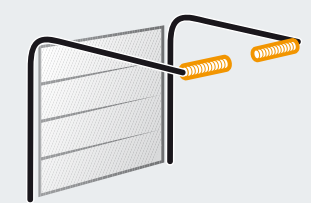

Perimeter and intermediate seals

Hörmann doors come with a perimeter seal. For additional sealing, they even feature intermediate seals between the individual door sections.

N Track

Normal tracks (N) with torsion spring technology. Minimum 350 mm headroom.

L Track

Low Headroom tracks (L) with torsion spring technology. Minimum 180 mm headroom.
