

Industrial Sectional Door SPU F42

Save energy thanks to thermal insulation

 *Made in Germany*

HÖRMANN

Hörmann Industrial Sectional Door SPU F42

Double-skinned insulated steel sectional doors

Sectional doors open vertically and thus create more space in front of and behind the door. The door sections are parked flat underneath the ceiling, vertically above the opening or in line with the roof. Series 50 sectional doors, made of steel, steel/aluminium combination or aluminium, are set apart by the programme range, top door design and certified security. Therefore, very little space is required which is a special advantage for halls with dome lights, glass roofs or glass facades. The door sections are filled with polyurethane rigid foam. This 42 mm thick insulating core provides for the convincing robustness and thermal insulation.

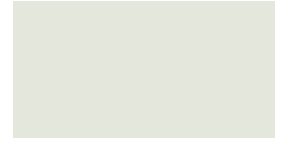

* **Note:** Doors with special colors and wicket doors are not included in the 1 week delivery programme

Colour

The outside and inside of the door is Stucco-textured in grey white (RAL 9002). The Stucco texture makes the surface resilient to dirt and small scratches.

Glazings

Section windows made of scratch resistant DURATEC synthetic glazing allow for a permanently clear view and additional light in the building.

Type A

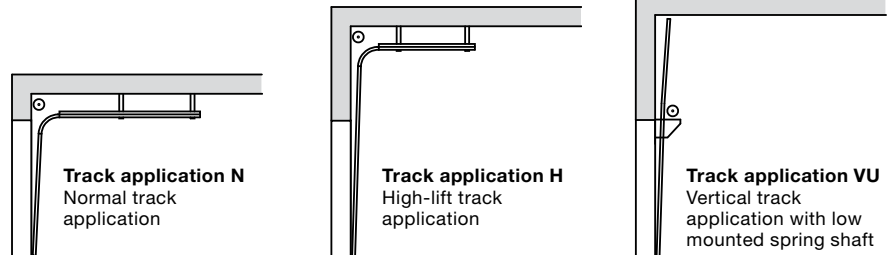

Glazing frame: Plastic frame, black
Clear view: 635 × 245 mm
Door section height: 625 mm, 750 mm

The door sections

The door sections are filled with polyurethane rigid foam. This 42-mm-thick insulating core provides for the convincing robustness and thermal insulation.

Track versions

Service inspection, maintenance and repair – with manufacturer's expertise

The after sales and service team, which is comprised of highly skilled technicians, electrical and mechanical engineers, is committed to providing you with the best support and expertise that makes our brand a leading name in the market.

Corrective maintenance

Identify, isolate and rectify a fault in order to restore an asset into an operational condition.

Preventive maintenance

Servicing and care for the purpose of maintaining equipment and facilities in a satisfactory operating condition by providing regular inspection, detection and correction of incipient failure either before they occur or before they develop into a major defect.

Warranty

The warranty period for the industrial sectional doors is one year which can be extended to two years by signing a service and maintenance contract before handover. The warranty on door panels for sectional doors is 10 years against corrosion.
