Responsibility for generations

The Hörmann family business has over 85 years of experience as a construction component specialist. This gives us an obligation to both current and future generations. That's why environmental responsibility plays such an important role for us. With this in mind, we develop innovative solutions for sustainable products and intelligent environmental protection.

“A GOOD REPUTATION MUST BE EARNED.”

August Hörmann

In keeping with the tradition started by the company's founder, the Hörmann brand is a true promise of quality and, with sales of over 20 million doors and operators, is one of Europe's most successful suppliers. Due to the comprehensive international sales and service network, Hörmann is your strong partner for high-quality construction components.

WE THINK AND ACT GREEN. As a family business, we are very conscious of our responsibility to future generations. The Hörmann climate protection strategy aims to reduce and avoid CO₂ emissions. We cover 100% of our electrical power needs at all European production locations with purchased green electricity. We are also investing in a clean future with other measures such as the use of recycled paper, CO₂-neutral postal shipping and the recycling of transport packaging to save more than 75,000 tons of CO₂ every year. We work with ClimatePartner to offset the emissions that we do generate by supporting certified climate protection projects. In particular, we offset all CO₂ emissions produced in manufacture of products for residential construction as standard. Products for construction projects are also available as CO₂-neutral versions upon customer request.

Brand quality Made in Germany

In addition to all major elements for building and renovating projects, the family-owned company Hörmann also offers innovative storage space systems from a single source. We manufacture in highly specialised factories using state-of-the-art production technologies. Our employees work intensively on new products, continual further developments and improvements to details. The results are patents and unique products on the market.

20-year
warranty *

LONG-LASTING. GUARANTEED. All major storage space system components are developed and manufactured by Hörmann. Endurance tests under real conditions ensure mature series products with Hörmann quality. Thanks to this and uncompromising quality assurance, you receive a 20-year warranty on all Hörmann Berry tool sheds and Berry firewood racks and Juno garden boxes.

* The complete warranty conditions can be found at: www.hoermann.com

CERTIFIED SAFETY FOR YOU AND YOUR FAMILY.

Hörmann storage space systems offer the highest quality and safety. To achieve this, all tool sheds and firewood racks are made of a powder-coated, hot-galvanized sheet steel. Without any sharp edges and with high-quality doors, locks and hinges. This provides you and your family with safety during daily use.

The compelling advantages of metal storage space systems

Storage space system made of metal offer many advantages over wooden sheds. They are not combustible and do not warp. Thanks to the hot-galvanized sheet steel, they are low-maintenance and resistant to both weather and mould. The steel used consists of 25% recycled material. The tool sheds, firewood racks and garden boxes are 100% reusable.

ROBUST CONSTRUCTION. The high stability of the storage space systems is achieved by a steel frame construction and a higher material thickness than is usual on the market (up to 1.5 mm). All bolts and hinges are galvanized and thus protected against oxidation. The tool sheds are equipped with reliable door locks and high-quality hinges as standard. To ensure that valuable objects such as e-bikes can be parked even more securely, the locking system can optionally be retrofitted with a cylinder lock.

IN ALL KINDS OF WEATHER. With the door closed and fixed to the foundation, Hörmann tool sheds can withstand wind speeds of up to 150 km/h and a snow load of 150 kg/m².

With great attention to detail

All Hörmann storage space systems are developed with attention to details and everyday functionality. Thanks to the high quality and robust construction, you will enjoy your tool shed or firewood rack from Hörmann for a long time. Treat yourself to the wide range of storage space systems and matching comfort down to the last detail.

FAST AND EASY FITTING.

All Hörmann storage space systems are delivered with a maximum degree of prefabrication. The appropriate tools are also included in the scope of delivery. This makes for quick and easy assembly and fitting.

MATCHING PERFECTLY. For a uniform and harmonious appearance, the firewood racks and tool sheds can be made to match. The firewood racks match the tool sheds perfectly in terms of height.

→ All information on the firewood racks can be found from page 26.

At Hörmann, the door hinges are supplied matching the shed colour.

SAFE FUNCTION. The dampers integrated into the garden boxes as standard ensure extremely comfortable opening and closing. They prevent injuries by slowing down the movement of the cover.

We think green

A green roof offers a host of advantages for the environment and for the building itself. It improves air quality by filtering pollutants out of the air and producing oxygen. A green roof also reduces the heat effect in built-up urban areas, as it absorbs less heat than conventional roofs. A green roof absorbs sound exposure, which in turn reduces noise. It can absorb and filter rainwater before it enters the sewage system, and this helps improve water quality. The green roof also acts as weather protection, against hailstorms for example.

GENEROUSLY PROPORTIONED GREEN ROOF. All Berry tool sheds with a pent roof can be fitted with a roof frame in preparation for a green roof.

The system is rated for a maximum saturated weight of 65 kg/m².

→ Further information on the roof frame can be found on page 44.

BOTTOM. Bicycle rack accessories

ATTRACTIVE AND CONVENIENT. With its wide sections, the Berry tool shed Modern pent roof has an elegant appearance. The transom light with scratch-resistant DuraTec glazing as standard provides natural light. Thanks to the high-quality materials, you will enjoy your Hörmann tool shed for a long time.

→ Further information can be found starting on page 34.

OUR RECOMMENDATION. All doors can be equipped with mechanical hold-open devices with gas springs as standard – for controlled opening and closing. This way, the doors are stopped smoothly, closed automatically or held open. This is really convenient when taking objects in and out of the shed!

→ Additional accessories can be found from page 44.

Classic style with pent roof

TIMELESS AND ELEGANT. The Berry tool shed Classic pent roof is characterised by narrow, vertical slats – a design that combines style and shape in a timeless manner. The transom light with scratch-resistant DuraTec glazing as standard provides natural light.

→ For all designs and details, see from page 34.

NEW. Classic Air style

AIRY AND SOLID. The new Classic Air and Classic Air Plus Berry tool sheds with their rows of holes on the side provide natural ventilation and daylight. They are ideal for bin storage areas or bicycle shelters. Both styles are available with a pent roof as well as a gable roof. For use as a bin storage area, we recommend the aluminium base construction and aluminium corrugated sheet floor accessories.

→ For more information on the Classic Air style, see from page 34.

→ For more information on accessories, see from page 44.

Modern style

PROTECTED AND AT HAND. The Berry firewood rack Modern is made of hot-galvanized, dimensionally stable sheet steel and is therefore practically maintenance-free. The practical storage unit is available in two styles and two sizes. It can be used to store wood, protecting it against all adverse weather effects.

→ Available with standard cross strut or optional rear wall.
Further information can be found starting on page 38.

MANY COLOURS TO CHOOSE. In addition to the two styles Classic and Modern, Berry firewood racks can be configured in nine standard colours, the Golden Oak decor and optionally in RAL to choose. Firewood racks can be optimally matched with Berry tool sheds not only in terms of colour, but also height. In the summer, the racks can be used to store garden furniture, the barbecue or garden tools, for example.

→ Further information can be found starting on page 38.

HIGH-QUALITY STORAGE SPACE FOR BALCONY AND GARDEN.

The Juno garden box is extremely durable and virtually maintenance-free thanks to its robust construction from galvanized sheet steel with high-quality paint. This makes it ideal for storing cushions, toys, garden tools and patio items on the balcony or in the garden. The standard two-point locking with metal fittings and the cylinder lock integrated in the cover ensure secure protection. Height-adjustable feet and closing dampers as standard provide additional comfort.

→ Further information can be found starting on page 40.

Berry tool sheds with pent roof

Styles and types

- | | |
|---------------------|--------------------------|
| 1 Modern style | 2 Classic style |
| 3 Classic Air style | 4 Classic Air Plus style |

Advantages

- Integrated, highly scratch-resistant Duratec glazing for daylight inside
- Elegant eaves
- Quick and easy fitting thanks to maximum degree of prefabrication
- Stability thanks to steel frame construction and high material thickness
- Aluminium bottom frame included in the price
- Two different styles can be selected: Classic and Modern
- Low-maintenance and weather-resistant
- Barely visible bolts
- Convenient passage height and wide doors
- Reliable door locks and high-quality hinges
- Without sharp edges and therefore particularly child-proof
- Extremely robust and dimensionally stable
- Door handing possible on the left or right – for tool sheds without a window in the door
- Standard profile cylinder
- Additional ventilation (for Classic Air and Classic Air Plus styles only)

Double doors

All Berry tool sheds can be optionally equipped with a double-leaf door for a wider clear passage width.

Glazing

Glazing elements¹ can be integrated at a surcharge. The glazing frames are white as standard. Optionally, the frames are available in a RAL colour² matching the tool shed as well as in RAL to choose.

¹ Not available for Classic Air and Classic Air Plus styles

RAL to choose

Hörmann storage space systems are available in all RAL colours for a surcharge.

Please note:

The Golden Oak decor is available for a surcharge for tool sheds as well as firewood racks with the Modern style. Storage space systems with this decor are white on the interior.

Only from Hörmann

1 Including aluminium bottom frame

Unlike conventional tool sheds, the aluminium bottom frame is already included with Hörmann tool sheds as well as firewood racks. The frame offers stability and protects against the weather and corrosion.

2 RAL to choose

Hörmann tool sheds and firewood racks are available in all RAL colours for a surcharge.

3 Material thickness up to 1.5 mm

Strong material thicknesses of up to 1.5 mm are used for optimum safety and long-lasting quality.

4 Door hinges in shed colour

The door hinges of Hörmann tool shed doors are always supplied in the shed colour. In this way, the sheds retain their attractive, elegant appearance.

Fast and easy fitting

All Hörmann storage space systems are delivered with a maximum degree of prefabrication. The appropriate tools are also included in the scope of delivery. This makes for quick, easy and straightforward assembly and fitting.

Accessories

For exterior

All Berry tool sheds can be easily and individually expanded both on the inside and outside. With our practical accessories, you can customise the tools shed according to your wishes.

Maximum prefabrication

For easy and straightforward assembly

With the included tool set, the Hörmann storage space system can be assembled quickly and easily. Thanks to a maximum degree of prefabrication and fewer individual parts, you always stay on top of things.

Foundation

For a stable subsurface

Only from Hörmann

With aluminium bottom frame as standard:
Protection against rust and more stability

Side:
1 part

Front:
6 parts

Berry tool shed Classic gable roof,
Size: type 2, single-leaf door

For full stability and safe assembly of Hörmann tool sheds and firewood racks, a horizontal substructure is required. The storage space systems are fixed and fitted on a paved, asphalted or concreted surface at least the size of the tool shed. If the substructure is not level, this may lead to restrictions in terms of assembly, functionality and safety.

Structure and fastening of the aluminium bottom frame to the subsurface, shown here using stone slabs

- 1 Dig out and level the lawn to a depth of approx. 10 cm.
- 2 Lay the paving stones and align them with a spirit level.
- 3 Apply the aluminium bottom frame.
- 4 Fasten to the paving stones with the enclosed angle set (16 units) and bolts.

NEW. If a paved, asphalted or concreted level base surface is not available, we recommend the new screw foundation with ground anchors. This fitting method allows the tool shed to be levelled even when the surface is uneven. The plus point: You get more flexibility for remodelling your garden at a later time.

Assembly and fixing of the aluminium base construction in the ground with screw foundation

- 1 Fit the aluminium bottom frame to the base construction and position at the planned location.
- 2 First align the 4 outer ground anchors with the bottom frame, then position the remaining ground anchors. A screw-in aid is included in the delivery package as standard.
- 3 Fasten the ground anchor to the bottom frame and the base construction using the mounting plates and brackets.
- 4 Align the individual fixing points using the height-adjustable screw connection for a level, firm foundation.

Experience Hörmann quality in new construction and modernisation

Hörmann provides an excellent basis for comprehensive planning. Carefully matched solutions offer you the very best in perfectly designed products for every area.
